LEARNING BY MOVING

Helping Children Learn Through Fun

The human brain engages the body to explore and understand the world around us. When children play, they're not just having fun — they're actively learning and developing a deeper understanding of the natural world. Through play, children grasp important concepts and the laws of nature, turning every moment of fun into a valuable learning experience. Playtime is serious business, where kids are hard at work discovering and growing.

All Winther's products are designed to make children want to play. Our products invite activity. They create that magical space where youngsters lose themselves in play; involved, happy, and active. In this environment, children form healthy habits that will last a lifetime.

SidebySide Taxi (494.00)

Give your little ones the joy of cruising together with their best pals, creating happy moments of social play with this eye-catching, motorcycle-inspired trike.

winther

History

For four generations, Winther has been a renowned Danish family business.

Since the 1930s, Winther has produced high-quality products with a craftsman's pride, focusing on the play and movement of children.

1930

1940

1950

1960

1970

1930 An idea taking shape

Anders Winther loses one leg in a traffic accident and can no longer work as a blacksmith. Whilst, inspired by children playing in the snow, he starts to develop toboggans for children in his father-in-law's smithy.

1933 New modern factory

Production increases rapidly and Anders Winther builds his own factory with modern machines. His brother Frede Winther is also employed by the company.

1935 New products

Inspired by how children play outside, production of tricycles and scooters commences. More people are employed.

1940 - 45 World War II

The lack of raw materials takes Anders Winther on a brief detour to peat winning. Shortly after the end of the war, Anders Winther unfortunately dies at a young age. The company continues under the management of L M Jensen and Frede Winther.

1947 The first bicycle

The first bicycle with pedals located on the front wheel is launched.

1948 From local to national

Staff are employed to handle sales in Copenhagen. Winther now sells to all areas of Denmark.

1951 Improvements in quality

The first bicycle with a chain-and-sprocket drive is introduced and the quality of the products is improved. This is the starting point for the reputation of Winther bicycles for being robust and durable.

1955 The export market

Winther enters the export market. Winther starts exporting primarily to Northern Europe. Already in 1960, exports make up one-third of the company's turnover.

1959 A classic is born

In 1959, the first tricycle is launched. The cycle has been continuously developed and, today, it is a true classic.

1960 Focus on children's bicycles

To concentrate attention on children's bicycles, the other product lines are phased out.

GONGE

1998 Learning by Moving

Children's play and well-being is placed on the agenda and conceptualized during the 1970s. Winther joins forces with designers and experts in children's play and development. Play and movement produces happier children and stimulates their learning and healthy development.

The philosophy of 'Learning-by-Moving' becomes more specific. Motor development skills are considered in the design of the products.

2010 Gonge merges with Winther

The company Gonge Creative Learning merges with Winther. Gonge has a range of toys for indoor use and focuses on motor development skills and is thus a good supplement to the existing Winther ranges.

1973 Third generation

In 1973, Anders Winther – the grandchild of the founder – takes over the management of the company.

1980 The range is expanded

The range is expanded with junior bicycles and adult bicycles.

1980 — 1990 — 2000 — 2010 — 2023

1985 The daycare market

Daycare bikes for nurseries and kindergartens are added. The Mini Viking line is launched.

2003 Turtle Kiddy Bus

The model Turtle Kiddy Bus is launched.

2006 Kangaroo cargo bikes

Kangaroo cargo bikes are developed and brought to the market.

2007 Focus on daycare bikes

Winther dedicates itself fully to the market of daycare bikes and divests the business area of junior and adult bicycles – with the exception of Winther Kangaroo cargo bikes and bike trailers. At the same time, the export market is developed with a vendor network.

2008 Circleline

The Circleline series is introduced.

1990 Viking

The Viking line is introduced and put on display at the world's largest toy fair in Nuremberg.

Winther today

2023 From local to global

More models and new series are added which all challenge the motor skills of children in different ways. The interest of the founder, Anders Winther, in children's play and development lives on today in the DNA of the company. And Winther's daycare bikes are now exported worldwide.

Mette Winther takes up the post of managing director.

You can find even more info about the history of Winther at www.a-winther.com

The Great Outdoors

*Experience the thrills of the Great Outdoors!
Unleash the joy and excitement of outdoor play with Winther's
exceptional trikes and bikes. Our carefully crafted and innovative designs
ensure that every adventure is filled with endless fun.*

Outdoor play

It is very important that we support the play, which is so essential to fomenting our children's well-being. Research suggests that outdoor activities are good for children and help lay a solid foundation for their learning. Plus, the fastest thing that spreads outside is good moods and big smiles.

By including movement and physical challenges as part of a child's everyday life, it is possible to help them to develop and automate fundamental motor skills at as early a stage as possible.

Playful activity is our philosophy

Physical play and movement are also a part of Winther's philosophy, or Learning by Moving as we call it here. This is a philosophy which has also found its way into our kids trikes, with active play and physical development having been incorporated into the design of our models over the decades. Our trikes encourage all manner of spontaneous play and a wide range of physical and social activities.

Just take a quick glance at our catalogue and you will soon see for yourself: from the kid who intuitively picks up a Viking Scooter on the playground and whizzes off with the wind in their hair to the little flock of kids that heads off to the sandbox, arriving on their Mini Viking Racing Scooters or Tricycles. Or the bigger kids who really put pedal to the metal as they race on a Viking Bob Kart or a Viking Easy Rider.

Valuable playfulness

The play value is high, but just as importantly, it delivers those golden moments which make a positive difference to that so crucial stage of life that childhood is. Especially since play is not only good fun, but an opportunity to interact with other kids. Friendships forged through play are a huge part of a child's further development and learning. Ideally, a good day's play should be at the top of every child's to-do-list. Playing is their "job" and the rewards follow in the form of many happy moments. Not only does this bring them great and well-deserved joy in the here and now, but it will stay with them for the rest of their lives.

Learning by Moving®

*Children learn through movement,
and all Winther products are thoughtfully designed
to inspire children's desire to play.*

Children develop their knowledge and skills by stimulating the brain. Their physical activity creates stronger links between the right and left sides of the brain, which is why it is important that they crawl, walk, cycle and generally move around. Playing allows them to experience the world with their own bodies and to understand the laws of nature by feeling, exploring, trying out things and challenging themselves physically.

It starts with a trike. It ends up as social intelligence

When children play with their trikes or other wheeled toys, this play is their world. The trikes can play any part the children like, from the youngest child's observation games to the complicated role-playing of older children.

Under the right conditions, children can rapidly turn their experiences into general understanding and awareness at a speed, and with a clear perception, that researchers find difficult to explain. All it takes is for children to be allowed to play freely.

Learning to know what is important

Children learn what is important as a reflex when cycling. When they are on a bike, they simply cannot look at everything. They have to stay focused, and they learn the difference between what is important and what is not.

Safety and quality

Winther is Danish design built with care; we care about what we do. Play is important, but high standards for safety and quality cannot be compromised.

A Winther product is true Danish quality, involving both new technology and old-fashioned craftsmanship.

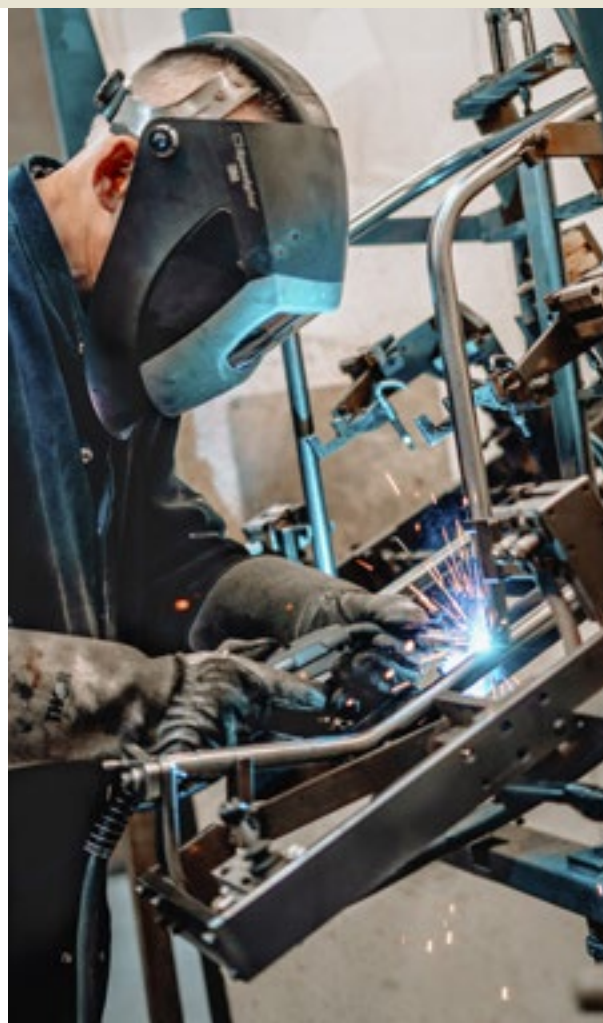

Modern production technology not only makes our wheeled toys affordable, it also ensures that they are robust.

Welding robots ensure our wheeled toys benefit from consistent weld quality and durable frames, and our powder coating is extremely strong and rust resistant.

Experience and skill

Our very experienced, highly skilled craftsmen perfectly complement the modern technology, providing the attention to detail necessary to maintain production quality. We think of even the smallest detail in every product, ensuring they are ergonomically correct, with no sharp edges. In our opinion, the joy of children's play should not be spoiled by mistakes in design or production.

This ensures that our wheeled toys can withstand hard knocks in the playground.

After sales service

At Winther, we take pride in delivering products that fulfill the needs of those who buy and use them.

Our commitment to service and cooperation is unwavering, and we welcome your feedback. In the event of any issues, we strive to resolve them swiftly.

Additionally, our extensive range of spare parts contributes significantly to sustainability by ensuring that our bikes can be maintained and enjoyed for many years. This dedication to preserving our products supports a more sustainable future.

- ✓ Maximum safety and durability
- ✓ Complies with all current safety standards
- ✓ 5-year warranty on frame and fork
- ✓ Easy to assemble
- ✓ Full spare parts service
- ✓ Exploded spare part drawings are all available at www.a-winter.com

VIKING

For kindergartens, schools, after-school clubs and playgrounds. Suitable for ages 2-12

Probably the Best in the World

Viking offers what is likely the world's best range of wheeled toys for educational use. Our collection features a wide variety of options, each crafted with unmatched quality and durability. Viking products provide children with countless opportunities for play and exploration. You'll find our toys worldwide, often accompanied by children deeply engaged in discovering themselves and

their surroundings. Viking toys offer exceptional play and activity value. Each product is designed to support children at various stages of motor skill development, aiding in their play and growth. The Viking range ensures that children have access to activities perfectly suited to their different sizes and abilities.

Tricycle, Small
Model 450.00

To a child, the small tricycle is love at first sight. It helps develop children's motor skills, trains their muscles, and develops their sense of coordination and space.

Width: 45 cm
Height: 51 cm

Length: 67 cm
Seat height: 28 cm

9.0 kg 0.103 m³

2 4

Tricycle, Medium
Model 451.00

This tricycle is a Winther classic. Millions of children have proved its worth. They cannot wait to get started once they see it and try it out with a trailer.

Patent no. ZL201130425225.9

Width: 52 cm
Height: 61 cm

Length: 80 cm
Seat height: 35 cm

11.4 kg 0.151 m³

3 6

Tricycle, Large
Model 452.00

This tricycle has a large front wheel, which allows slightly older children to use their strength. With a trailer, it becomes a tractor or Cinderella's pumpkin carriage.

Width: 57 cm
Height: 70 cm

Length: 92 cm
Seat height: 43 cm

12.4 kg 0.208 m³

4 8

TriCart
Model 469.00

An exciting alternative to the classic tricycle. The adjustable seat means the TriCart can be used by children of many different ages.

Patent no. ZL201130401690.9

Width: 57 cm Height: 75 cm	Length: 100 cm Seat height: 26 cm
 14.8 kg 0.167 m ³	 5 12

Easy Rider
Model 479.00

It is red and very cool with a low seat and a Harley-type handlebar. The large front wheel lets children work up a good speed and maintain momentum for hours on end.

Patent no. ZL201130425256.4

Width: 52 cm Height: 62 cm	Length: 82 cm Seat height: 15 cm
 11.4 kg 0.165 m ³	 4 7

Tricycles for Ages 2-10

By the age of three, when children have developed better body awareness, they can start learning how to pedal and steer a bicycle. The extra wheel provides support for those who haven't yet mastered balance.

The sense of independence that comes with moving around freely boosts their confidence, making all the effort worthwhile. Moreover, they make their own decisions and control the direction of play, entirely on their terms.

Children organize their activities and decide what will happen next.

Along the way, they explore various things in different ways, which enhances their self-development. At the same time, they strengthen their social skills by interacting with peers through play. Additionally, cycling improves their physical fitness, coordination, and balance, fostering overall well-being.

Ben Hur Tricycle
Model 465.00

Roman soldiers fighting a mighty battle - this tricycle stimulates imagination without compromising safety. Passengers standing up can hold on to the safety bar.

Patent no. ZL201130404545.6

Width: 58 cm
Height: 62 cm

Length: 100 cm
Seat height: 38 cm

16.2 kg 0.231 m³

4 7

Ben Hur Trailer
Model 466.00

Has Ben Hur been to Mars? No doubt – in a play universe near you. The Viking trailer fits all tricycle and taxis with a safety bar and slip-proof foot plate.

Width: 58 cm
Height: 58 cm

Length: 84 cm

11.0 kg 0.168 m³

4 7

**DELIVERED
FULLY ASSEMBLED**

Trailer
Model 476.00

This robust, stable multi-functional trailer can be easily attached to all tricycles and taxis. Slip-proof bottom. Can carry sand, toys or passengers up to 75 kg.

Width: 52 cm
Height: 25 cm

Length: 86 cm

11,5 kg 0.132 m³

Truck
Model 493.00

This sturdy bike provides children with opportunity for social role-play while moving sand and playground equipment around. Also exercises motor abilities and reflexes.

Patent no. ZL201130424897.8

Width: 52 cm
Height: 62 cm

Length: 103 cm
Seat height: 37 cm

9.0 kg 0.088 m ³ 9.3 kg 0.088 m ³	4 6 6 10

Scooter, Maxi
Model 495.00

A fun and challenging scooter aimed at slightly bigger children. The wheels of the scooter will never stop turning as long as there are children on the playground.

Width: 47 cm Height: 93 cm	Length: 121 cm
10.6 kg 0.128 m ³	8 12

Scooters for Ages 2-12

Many children are naturally bold and love the thrill of moving at speed. They will feel like little kings and queens as they whiz by on a scooter, easily picking up speed. With a low deck, scooters are simple for children to use—no pedal training required, and most kids intuitively know how to ride them. Scooters epitomize fun and provide great exercise, making them incredibly popular. They offer a smart way to get around quickly and provide excellent entertainment.

Scooters are also fantastic for improving a child's balance and coordination. Winther even offers a three-wheeled scooter, providing extra support for children not quite ready for the two-wheeled version. Additionally, using a scooter helps develop motor skills, enhances physical fitness, and boosts confidence as children master new abilities.

BikeRunner™
 Model 490.00
BikeRunner™ Large
 Model 474.10

The ideal play vehicle for children not yet ready for a scooter or bicycle. Provides a fun way of developing a good sense of balance and coordination skills.

Width: 44 cm Height: 52 cm	Length: 70 cm Seat height: 35 cm
Width: 45 cm Height: 70 cm	Length: 80 cm Seat height: 42 cm

Width: 46 cm Height: 49 cm	Length: 91 cm Seat height: 42 cm
8.40 kg 0.095 m ³	4 7

Bicycles from 4 years of age

At this age, children are ready to explore the joys and challenges of riding various types of bicycles. Introducing them to cycling offers a wealth of benefits that extend beyond mere transportation. Cycling actively contributes to muscle development, enhances balance, and hones hand-eye and foot-eye coordination. Additionally, it provides vital sensory stimulation, which is essential for their overall growth and development.

The process of learning to ride a bike is also deeply enriching for a child's self-esteem. Mastering this skill gives them a sense of independence and the exhilarating freedom of moving under their own power. Furthermore, cycling fosters social connections. When children ride together, they create shared experiences that strengthen their bonds and build a sense of community.

Beyond the physical and social advantages, cycling nurtures essential life skills that stay with them forever. The confidence and coordination developed through biking will serve them well in various aspects of life. Riding a bike is not just about the immediate benefits; it lays the foundation for a healthy, active, and socially connected lifestyle that endures long into the future.

Bicycle | Model 474.00 Bicycle, Large | Model 491.00

Once children master the two-wheeler, they have reached another milestone in their development. Legs, arms, eyes and brain have to work together to keep the balance.

VIKING CHALLENGE

For kindergartens, schools and playgrounds
Suitable for ages 2 and up

Innovation and Durability Combined

The Viking Challenge collection from Winther perfectly blends innovation and durability, tailored for kindergartens, schools, and playgrounds. These unique toys prioritize exceptional safety and robustness while offering outstanding play value. Having a variety of distinctive and enjoyable vehicles on the playground enriches children's playtime,

encouraging exploration and imaginative scenarios. These vehicles promote physical activity, helping children develop essential motor skills and coordination while having fun. Investing in Viking Challenge vehicles transforms any playground into a vibrant hub of activity, where children continuously discover new ways to play, interact, and learn.

Vehicles for two and more children

When a small group of children share a bike or trike, it is an ideal opportunity to try out role-playing activities. When children pretend to be busy police officers pursuing a criminal, or a chef making delicious meals in the sandbox, they role-play adult behaviours that can help prepare them for adulthood.

When they experiment with identities and imaginary situations, they learn more about their surroundings. They have an idea of how things work, and these theories are then tested out in reality. Role play is vital to a child's development. It helps to develop the child's empathy while also improving their ability to communicate with others.

Group play often leads to friendships. For example, when multiple children crowd together around a Winther Twin Taxi, their enthusiasm and engagement rub off on each other. They are encouraged to play even more, which often means that they stay active for a longer period of time.

14.40 kg 0.130 m³

3+

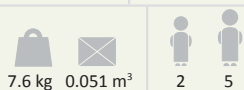

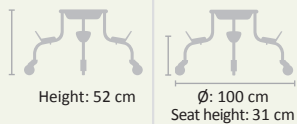

CircleBike with Tub | Model 626.42

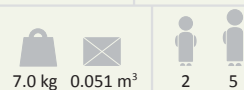

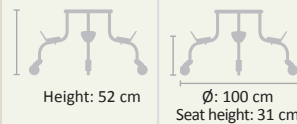

The perfect companion for little adventurers aged 2-5. This social trike not only accommodates three passengers, but also features an integrated Tub.

Witness their imaginations take flight, when filling the Tub with toys on the playground. Let the adventure begin!

**CircleBike
 Model 626.51**

Funny carousel that challenges the children's ability to coordinate, as the wheels can take them in any direction. Provides for numerous plays of social character. Unassembled version. Patent no. 201530038363.X

Circle Walking Wagon Model 637.00

The perfect companion for your little ones

Crafted with utmost care and designed for children aged 1-3 years, this Circle Walking Wagon is a sturdy and secure way to support your toddler's early adventures.

The Circle Wagon Walker features a unique design with two fixed wheels at the back for stability and two swivel wheels at the front for easy maneuverability. This ensures a safe and comfortable walking experience for your little ones, helping them build confidence, as they take those initial steps.

At the heart of the Circle Wagon Walker is a circular compartment, providing a versatile space for the children to engage in creative play. Whether it is filling it with sand for a sensory experience or placing their favorite toys inside, the possibilities are endless.

Circle Wheelbarrow Model 635.00

This unique "wheelbarrow" offers many great activities on the playground; filling the tub with sand or toys to meet with friends. Excellent for role playing.

Width: 46 cm
Height: 33 cm

Length: 89 cm

6.8 kg 0.137 m³

Special wheeled toys

Motivating children to engage in physical activity requires an exciting and encouraging environment for play. Winther therefore also has a special series of wheeled toys that can challenge the child in new ways. For example, the child can test all their coordination skills with Winther FunCart's unique steering system. Cycling can also mean winding through the landscape like a snake on a Foot Twister, or it can be reminiscent of rowing, using hand pedals such as those on a Winther RowKart or Swingcart. These create an exciting and educational setting for the child, who will explore the different bikes with curiosity.

At the same time, the cleverly designed bikes are supported by fun accessories: a colourful petrol station or a hand trolley that helps interesting goods change hands. They ensure that the child's imagination runs wild so that role play and group play can flourish.

DELIVERED FULLY ASSEMBLED

Medi FunRacer™ Model 634.00

A great and innovative item that will surely be adored by many children. With its two handle pins above the rear wheels, it provides an exciting way of developing the child's coordination skills. A world of fun at any playground.

CIRCLELINE

For kindergartens, day-care facilities
and playgrounds. Suitable for ages 2-8

Captivating and Modern Design

Circleline is Winther's sporty range of trikes, bikes, and scooters, specifically aimed at the educational market. The series is characterized by an attractive and modern design, combined with robust quality that meets all current safety standards on the market. The various models in the Circleline range offer countless opportunities to stimulate children's motor skills, creativity, and social abilities.

When developing Circleline, it was crucial that the products be easy to assemble. And they are. Each vehicle comes in just two parts that can be easily put together - it really is that simple. Imagine children zooming around on their stylish trikes, inventing new games, and enhancing their skills while having fun.

Tricycle, Small
Model 550.50

The classic tricycle in a brand new design. Every child loves the freedom to get around on the trike. Easy to move forward, trains the muscles and develops motor skills.

Width: 45 cm Height: 53 cm	Length: 67 cm Seat height: 27 cm
8.0 kg 0.081 m ³	2 4

Tricycle, Medium
Model 551.50

A popular, robust tricycle suitable for most children. A must on every playground. Stimulates the play of children and develops motor skills.

Bike Runners 2-7 years

Winther's balance bikes are ideal for practising basic balancing skills. The ability to sit upright comes before the ability to operate pedals, but the legs and feet can act as training wheels. Contact with the ground gives the child a safe and easy start, which gives them confidence to do more. The child learns to push off from the ground, get moving and maintain speed. It is a gentle and fun start to a life of cycling, and a great way to learn how to keep their balance on a moving bike. After a little practice, a balance bike gives children the opportunity to push off from the ground on a fast-moving bike, navigate at speed, and take part in group play that involves speed and movement.

A balance bike also challenges the child's motor skills. When riding a balance bike, the child has to push off with their legs, coordinate their arms and legs, assess the distance and steer clear of any obstacles encountered along the way.

Bicycle
Model 558.50

When riding this bicycle, the children have reached the freedom to explore the world. They can easily get around and use their motor skills.

Patent no. ZL201130425243.7

Safety Scooter™
Model 430.20

The toddler's first push along scooter. The design with 4 wheels makes it stable and attractive to ride for the smallest kids. Robust and durable.

Patent no. ZL201130424923.7

Width: 36 cm
Height: 33 cm

Length: 55 cm
Seat height: 22 cm

Push Bikes 1-3 years

Children experience so much joy when they can ride unaided across the playground, visit their little friends and explore and discover the world. And the same goes for very young children who have not yet mastered the art of pedalling.

So it is a good thing that a pushing movement with the feet can serve as a substitute for pedals. When a child pushes off using his or her feet, it helps them to practise the pedalling motion.

That is good training before they attempt to use pedals, which could be the child's next achievement. And concentrating on staying on the saddle helps to improve their ability to balance as well.

PushBike for one
Model 431.20

Suitable for the very young. The double front wheels provide extra support during the training of balance skills. Propelled forward using the feet.

Patent no. ZL201130404549.4

ACCESSORIES

Wall Rack and Cycle Rack

Take care of your products

Even the strongest equipment suffer unnecessary wear unless it is looked after properly. Two-wheelers and scooters last longer if you put them away carefully.

To help with this, Winther has developed two different storage systems that make it easy to keep play areas and bike sheds tidy and in good order. One rack is wall-mounted, and the other is a combi-rack for three two-wheelers.

Wall Rack | Model 391.44

Wall-mounted rack for trikes and bikes. Saves lots of floor space. The front wheel is placed in the rack. Items are kept out of the way.

1.0 kg 0.004 m³

Cycle Rack | Model 391.45

Cycle rack for three scooters or two-wheelers that keeps them tidy and well-ordered. Should not be mounted near children's play areas.

3.80 kg 0.045 m³

Other Senses

The tactile sense is stimulated by the wind, air temperature, sun, rain felt on the skin of the face and body. Also, the smell and sound are stimulated.

TURTLE KIDDY BUS

For day-care facilities and crèches. Suitable for ages 6 months up to 3 years (max. 15 kg)

A great trip for the children – and their adult!

The Turtle Kiddy Bus makes children want to go for lots of outdoor rides. It makes outdoor activities easier and safer for both children and adults. The Kiddy Bus is not only robust, it also features a well-thought-of design that focuses on safety, durability and ergonomics. It is combined with a number of practical details and - of course - room to do what children do.

The Kiddy Bus is available in different models, with room for both four and six children aged 6 months up to 3 years (max. 15 kg). This makes the Turtle Kiddy Bus a great advantage in day-care facilities and crèches. It is also useful in fun parks, theme parks and zoological gardens.

The Turtle Kiddy Bus is intended for use on pavements, walkways and roads.

Easy to push, easy to steer, easy to love

We all know that children and their gear can be quite heavy. We have therefore focused on the ergonomics of moving the Kiddy Bus around. The Kiddy Bus is made of plastic and aluminium, which keeps it extremely light, and makes it easy to push.

The front wheel turns, which makes it easy to maneuver the Kiddy Bus and change direction. There is no need to lift the Kiddy Bus to turn corners.

The children sit in pairs opposite each other, making it easy to talk with their friends. They get in and out through a side door, just like in a real bus. It is fun for children, and it saves adults the strain of repeated heavy lifting.

Turtle Kiddy Bus 6-seater | Model 801.00

- Room for six children aged 6 months up to 3 years (max. 15 kg)
- Delivered fully assembled
- Fits through doorways

Learning by Moving

All in all the biggest benefit is learning new skills by joyful play with multiply repetitions, failing and trying again which create this unique myelination process in the brain, where the nerves gets extra insulation of its axon enabling them to transport the signals/information faster, enabling you to get really good at what you are doing.

Therefore, it is important to challenge children physically in many different ways, so they keep exploring the opportunities of the brain and body.

WINTHER PLUS

For day-care facilities, crechés,
kindergartens and private use

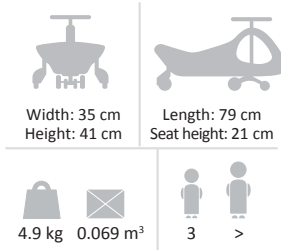

Winther PlasmaCar

Model 951.00 red | Model 951.01 blue

With its sleek lines and low profile there is no doubt that the PlasmaCar is built for race. But there is no need for gasoline. The PlasmaCar is propelled by a renewable and inexhaustible resource: kid-power! And it is easy to operate. A sideways wiggling motion of the child's body is all it takes. Absolutely safe, absolutely fun! Not recommended for use on hardwood floors or laminated flooring.

- Maximum load: 55 kg on uneven surfaces. 100 kg on smooth surfaces
- Built to last: High quality plastics
- No sharp edges
- No pedals or gears
- No batteries required
- Very simple and safe to operate

Bike Helmet

Model 192.55

Children's safety helmet with size adjustment and adjustable chin strap with safety closure. Children must not use this helmet when climbing or during other activities where there is a danger of strangulation.

Size: 52-56 cm

Winther and Gonge - playing together

Winther produces trikes and bikes and other wheeled toys for “learning by moving”. Gonge produces toys and educational products that stimulate play and movement for “creative learning”. These two philosophies match so well that merging the companies was a natural development.

Winther and Gonge both supply kindergartens, schools and other institutions globally. The two companies also supply the retail market. And the range of products of the two brands complement one another to offer a wide variety of ways to children playing, moving and learning. Gonge was merged with Winther on 1 July 2010.

**Ask for Gonge’s catalogue at win@a-winther.com
and learn more about Gonge’s products at www.gonge.com.**

Winther Family Bikes

The Kangaroo family bike for two or four children gives freedom of movement for small groups of children – and for institutions and childminders. Find more information about this product as well as contact details on this website:
